ABOUT URBAN LIVEABILITY FORUM (ULF):
A platform to transform urban liveability through knowledge, networking and enabling communities.

ABOUT THE PROGRAMME:
The Urban Liveability Forum is working towards Smart Cities/ Urban Indexing as its flagship project; to be performed and published annually. The programme involves conducting research on various Urban KPIs in order to highlight best practices followed by Indian cities; as well as to identify pain points encountered by these cities.
The study is conducted with a vision of improving lives of Indian cities, making cities sustainable, resilient and inclusive. At ULF, we believe that data dissemination and participatory planning approach is the key to unlock India's Urban potential.

ROLES AND RESPONSIBILITES:
➢ Data mining and extraction for various smart cities indicators in a stipulated time frame.
➢ Primary data collection from concerned authorities/ stakeholders; as and when required.
➢ Data ingestion and analysis with regards to distinct smart cities KPIs and benchmarks.
➢ Review literature and draft knowledge pieces in the shape of reports, whitepapers, articles and/or presentations.
➢ Assist in internal strategic, operational or outreach activities as per capacity.

ELIGIBILITY:
➢ Master level students in the areas of Urban Planning, Urban Management, Urban Governance, Environment Planning, Transport Planning, Environmental Law or related fields.
➢ Excellent verbal as well as written communication skills.
➢ Proficiency in Microsoft Office suite.
➢ Extensive qualitative and quantitative research abilities.
➢ Knowledge of ArcGIS or SPSS would be an advantage.
